### **DETAILED ACTION**

1. Claims 1-30 are allowed.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the following limitation: 'receiving said segment specific selection criteria wherein said segment specific selection criteria comprises a global directive and a set of segment directives; reading a database definition for said hierarchical database; building a logical processing map utilizing at least said global directive, said set of segment directives and said database definition; reading a segment from said hierarchical database; and writing said segment to a target unload file if said segment has a type identified by said logical processing map and said segment is not an excluded root segment' as recited in independent claim 1 and similarly recited in independent claims 12 and 22.

As per claim 11, the prior art of record fails to teach 'providing the name of a target unload file; providing the name of said hierarchical database; and invoking a segment specific unload utility wherein said global directive, said set of segment directives, said name of said target unload file and said name of said hierarchical database are made available to said segment specific unload utility'.

Art Unit: 2167

The remaining claims 2-10, 13-21, and 23-30 comprise dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

The examiner agrees with the applicants' remarks, filed on August 9, 2004, page 2 lines 9-25; page 3 lines 10-25; page 4 lines 4-26; page 5 lines 4-26; and page 6 lines 4-7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
